ADDITIONAL INFORMATION:

ABOUT ME:

With over 18 years of experience in software development, I have progressed from an HTML coder to a versatile full-stack developer, technical leader, and infrastructure specialist.

My career spans diverse roles and responsibilities, including frontend and backend development, designing REST APIs and GraphQL services, integrating third-party services, and setting up developer infrastructure.

Key Skills and Experience:

Technical Leadership: Experience working as Tech Lead with responsibility for architecture, technical decisions, and coordination of cross-functional teams.

Frontend Development: Proficient in modern JavaScript frameworks (React, Next.js) and experienced in building Single Page Applications (SPA), including custom solutions without frameworks.

Backend Expertise: Extensive experience in Node.js application development using Express, NestJS and designing robust, scalable architecture.

API Development: Skilled in creating and maintaining RESTful APIs and GraphQL platforms with Apollo Server.

Payment Integration: Experience integrating payment systems (Stripe, Paddle) for processing subscriptions and one-time payments.

AI & Machine Learning: Work with OpenAI API and vector databases (Qdrant) for semantic search and natural language processing.

DevOps and Automation: Successfully implemented CI/CD pipelines, automated development processes and configured environments for applications on AWS and DigitalOcean.

Refactoring and Maintenance: Expertise in modernizing legacy codebases and developing projects from scratch.
