Pavel Pulin

Tech Lead & Full-Stack Developer

tel:+972559206723 mailto:pulin.pavel@gmail.com https://www.linkedin.com/in/pavel-pulin-156528b5/

Experienced Full Stack Developer specializing in Node.js and NestJS, with strong experience in database design and management, as well as solid front-end development skills. I effectively communicate and collaborate within cross-functional teams, and I'm committed to continuous self-development to stay aligned with the latest trends in modern software engineering. Additionally, I actively incorporate cutting-edge AI tools and workflows into my development process — including code generation, automated refactoring, architectural analysis — to enhance productivity, code quality, and solution design.

SKILLS

Node.js | TypeScript | REST APIs | Git | React | Express | NestJS | JWT | Cursor AI | Redux | GraphQL | Prisma | AngularJS | HTML5/CSS3 | Apollo Server | WebSocket | TypeORM | Docker | jQuery | PostgreSQL | Redis | Sequelize | Qdrant | AWS | GitHub Actions | Next.js | Jenkins | OpenAI API | Vector Databases | Stripe

EXPERIENCE

Valletta.Software
February 2025 — Present

Tech Lead / Full-Stack Developer

- Current role as Tech Lead / Full-Stack Developer at Valletta.Software
- Led delivery of two client projects: Zirtue and SoilSync
- Designed backend architecture and cloud infrastructure to ensure scalability and reliability
- Implemented AWS SNS/SQS integrations, payment failure handling, and critical negative scenarios
- Established testing processes and coordinated work across frontend, DevOps, and stakeholders

NodeJS, NestJS, TypeORM, Prisma, PostgreSQL, AWS, AI Prompting

Aithor
July 2024 — November 2024

FullStack Developer

- Developed new functionality for multiple websites, refactored old solutions
- Integrated payment systems Stripe and Paddle for online payment processing
- Set up authentication through Auth0 for secure user login
- Integrated Zapier for workflow automation and connecting various services
- Developed system using OpenAI API with Qdrant vector database for semantic search

React, Node.js, Stripe, Paddle, Auth0, OpenAI API, Qdrant

Impress
July 2023 — July 2024

Fullstack Developer

- Designed, developed, and led new services from scratch
- Supported and refactored legacy infrastructure
- Integrated third-party systems into different parts of the architecture
- Integrated Stripe payment system for processing subscriptions

React, Node.js, NestJS, Stripe, Legacy Systems, System Integration

Infobip LLC
December 2018 — June 2023

Backend Developer

- Developed and supported multiple services in distributed system
- Refactored legacy common library and migrated to separate services
- Developed GraphQL platform with Apollo Federation
- Integrated new translation system (Smartcat)
- Automated bulk updates across multiple web applications using Jenkins
- Designed versioning system for client applications per environment

Node.js, NestJS, GraphQL, Apollo Federation, Jenkins, Smartcat, Distributed Systems

Alfa-Bank
January 2017 — December 2018

Lead Frontend Developer

- Worked in Agile team with designer and product owner

- Developed frontend for mobile application and web using ReactJS
- Designed interface for internal services for getting card information
- Participated in interviews for new hires and mentored new developers
- Represented company at conferences

React, React Native, Agile, Team Leadership, Mentoring

SEMrush July 2015 — July 2016

Fullstack Developer

- Wrote bot for parsing sites using selenium and docker
- Created hundreds of bot instances to parse thousands of sites
- Designed API and NodeJS api architecture for client panel
- Cooperated with designers for building UI/UX
- Developed UI interface of client panel

Node.js, Selenium, Docker, Web Scraping, API Design, UI/UX

Geometria.ru December 2013 — July 2015

Frontend Developer

- Developing frontend with AngularJS
- Configuring build process with Grunt and Gulp
- JavaScript code optimization

AngularJS, Grunt, Gulp, JavaScript, Frontend Optimization

RealWeb December 2011 — May 2012

Frontend/Backend Developer

- Frontend with jQuery
- Backend with ZendFramework

jQuery, ZendFramework, PHP, Frontend, Backend

RealWeb November 2009 — December 2011

Frontend Developer

- HTML coding
- Template integration with XSLT
- Server-side functionality development

HTML, XSLT, Server-side Development

Webmaster.spb April 2008 — October 2009

HTML Coder

- Commercial sites coder

HTML, CSS, Commercial Websites

Altitudo September 2007 — April 2008

HTML Coder

- Commercial sites coder
- Template integration to UMI CMS

HTML, CSS, UMI CMS, Template Integration

Freelance January 2007 — August 2007

HTML coder

- Website creation and support

HTML, CSS, Website Development

PROJECTS

P2P Lending Platform

P2P lending application enabling users to securely borrow and lend money directly to each other. Implemented AWS SNS/SQS notifications, payment failure flows, and comprehensive testing processes.

NodeJS, NestJS, TypeORM, PostgreSQL, AWS, SNS/SQS

Fertilizer–Farmer Connectivity Platform

Technical leadership in developing a platform for US agricultural farms. Backend architecture and cloud infrastructure design, ensuring system scalability and reliability.

NodeJS, NestJS, Prisma, PostgreSQL, AWS, Cloud Architecture

AI-powered Search System

Semantic search system using OpenAI API and Qdrant vector database. Integration with multiple websites and workflow automation.

OpenAI API, Qdrant, React, Node.js, Semantic Search, Zapier

Payment Integration Systems

Integration of Stripe and Paddle payment systems for subscription and one-time payment processing. Setting up authentication through Auth0.

Stripe, Paddle, Auth0, React, Node.js, Payment Processing

GraphQL Platform

Development of GraphQL platform with Apollo Federation. Creation and implementation of subgraph services for distributed system.

GraphQL, Apollo Federation, NestJS, Node.js, Distributed Systems

Parsing Bot System

Website parsing system using Selenium and Docker. Creating hundreds of bot instances to process thousands of sites.

Selenium, Docker, Node.js, Web Scraping, API Design

Banking Applications

Frontend development for mobile application and bank web interface. Creating interfaces for internal services.

React, React Native, Agile, Team Leadership, Banking Systems

Legacy System Refactoring

Refactoring legacy libraries and migration to microservice architecture. Implementation of NestJS and CI/CD process setup.

NestJS, Jenkins, Legacy Systems, Microservices, CI/CD

Translation System Integration

Integration of Smartcat translation system with automation of repository parsing and phrase loading.

Smartcat, Automation, Repository Parsing, Translation Management
